

Opportunity to Start Your Own Business

Ritec International are launching a new opportunity - a Social Enterprise set up exclusively to help women to start their own business or complement an existing one.

Ritec manufacture an award-winning product called ClearShield®. This is sold worldwide to all the leading glass manufacturers and several high end shower manufacturers in the UK such as Matki, Simpsons, Crosswater to name a few. Ritec would now like to take this product directly into the interior shower market through self-employed applicators. Market research has shown there is a huge demand.

The purpose of the product is to make shower glass have an “as new” appearance and protect it with the award-winning and innovative ClearShield® system. ClearShield® protected glass becomes “non-stick” and easy to clean, resisting limescale, water marks and staining for years and also restricts the growth of harmful bacteria.

With this opportunity you can set up and run your own business. You can either carry out the application yourself or manage a team of licensed applicators. This is similar to an operation like “Molly Maids” but with a very modest investment as our aim is to be a social enterprise. Some of the profits from this venture will be donated to a women’s charity.

This is a special offer for the first 10 women who sign up

For a modest initial investment of £300 you will get:

- Products and tools to start
- Full training and technical support for you and your applicators
- Marketing materials
- Business and profitability model
- The backing of a reputable local company and help line support

The profit margins are high on this product 60% – 80% at gross profit. The product has won several industry awards and is well liked by all the major shower manufacturers.
